

ACADEMY

TRAINING

Knowledge is key and knowledge increases by sharing.

That's why we created MS Academy, so that we could have a training centre where people could deepen their expertise and reach their performances' full potential.

Levels Training

**STANDARD
TRAINING**

**ADVANCED
TRAINING**

LevelsTraining

In-House Training

In-person training at our Italian centre, MS Academy. The offered trainings are a mix of theory and practice. The number of participants is purposely maintained low, in order to provide to our customers an extremely personalised training and a direct exchange with our senior trainer.

To register, participants can write an email to academy@msitaly.com

Online Training

Our webinars are two-hour-long online training courses held by one of our senior trainers. They can be standard or personalised and are available for you and for an unlimited number of your staff members. To plan a webinar, you can reach out to our team by writing an email to academy@msitaly.com, detailing your interest for a standard or a personalised training and the date you would like it to be.

Site Training

Training at your facility. This course is held by one of our senior trainers who will come to your site, offering a training exclusively dedicated to you and for an unlimited number of your staff members. To schedule an onsite training, you can write an email to academy@msitaly.com to define your training needs and the date of the intervention with our team.

OUR OFFER

HOW TO REACH US:

In auto:

By car:

We are only ten minutes away from the motorway A9, the closest motorway exit is Lomazzo Nord.

By train:

The closest station is Lomazzo, the railway company is Trenord and you can buy a ticket on www.trenitalia.com

By plane:

Malpensa airport - MXP is located just 30km away from our MS Academy. You can request a taxi and you'll reach us in about 30 minutes.

Bergamo airport - BGY is located 60km away from our MS Academy. You can request a taxi and you'll reach us in about 1 hour.

Linate airport - LIN is located 50km away from our MS Academy. You can request a taxi and you'll reach us in about 40 minutes.

Stay:

For our customers in need of a stay, we have come to an agreement with **Just Hotel** in Lomazzo (CO), Via Ceresio, 49, 22074.

The hotel, by car, is only five minutes away from our MS Academy.

For further information, visit the website

www.justhotelgroup.it/just-hotel-lomazzo/

GENERAL INFO

Our goal is to give our customers the most personalised experience, so we adequate our courses schedules to our customers' needs, creating the trainings ad hoc each time. Our courses are held both in English and in Italian, they cover a wide range of different topics regarding machines and software. We have divided them into standard and advanced, so that we can meet the needs and wants of our customers.

If you want to know more, send an email to academy@msitaly.com

Our headquarter:

Via Bancora e Rimoldi 47
22070 Guanzate (CO) - Italia

MS ACADEMY

A horizontal row of seven small, solid-colored squares in the following order from left to right: teal, pink, grey, green, yellow, and red.

STANDARD TRAINING

MS ACADEMY

LARIO SINGLE PASS

This standard training has been designed for MS customers who wish to know all the functions related to the use of MS machines. The course is recommended before or at the end of the installation. The course will consist of theoretical sessions in the multimedia classroom and practical work sessions on machines. The topics covered will concern an introduction to single-pass technology, the machine interface, daily cleaning and maintenance, the drawing-in of the media, the printing methods, printing queue and parameters, printing problems, spare parts and MyMS.

[It is recommended to add LaRio Advanced Training for a full knowledge]

GOALS:

- Understanding the machine menus and standard parameters
- Managing and optimising machine drawing-in and its functioning
- Managing and analysing the cost report integrated into the interface
- Understanding how to print by materials
- Knowing and carrying out the daily cleaning and maintenance of the print heads
- Handling simple printing problems such as: bidirectional, pitch compensation and gradients
- Understanding how to order and manage machine spare parts
- Knowing and using the MyMS platform (where available)

TRAINING DURATION: 2/3 DAYS

PRE-REQUISITES:

To have a digital printing background - recommended for expert workers

CERTIFICATION:

At the end of the training course you will receive an MS Academy proficiency certificate

SCANNING MACHINES

This standard training is designed for MS customers who want to know the functioning of MS machines. The course is recommended before or at the end of the installation. The course will consist of theoretical sessions in the multimedia classroom and practical work sessions on machines. The issues addressed will concern the machine interface, the drawing-in of the media, the printing methods, daily maintenance, printing problems, essential printing parameters such as bidirectional and pitch compensation, gradient lines between passes, spare parts and MyMS.

[It is recommended to add the Advanced Training for a full knowledge]

GOALS:

- Understanding the machine menus and standard parameters
- Managing and optimising machine drawing-in and its functioning
- Managing and analysing the cost report integrated into the interface
- Understanding how to print by materials
- Knowing and carrying out the daily cleaning and maintenance of the print heads
- Handling simple printing problems such as: bidirectional, pitch compensation and gradients
- Understanding how to order and managing machine spare parts
- Knowing and using the MyMS platform (where available)

TRAINING DURATION: 1/3 DAYS

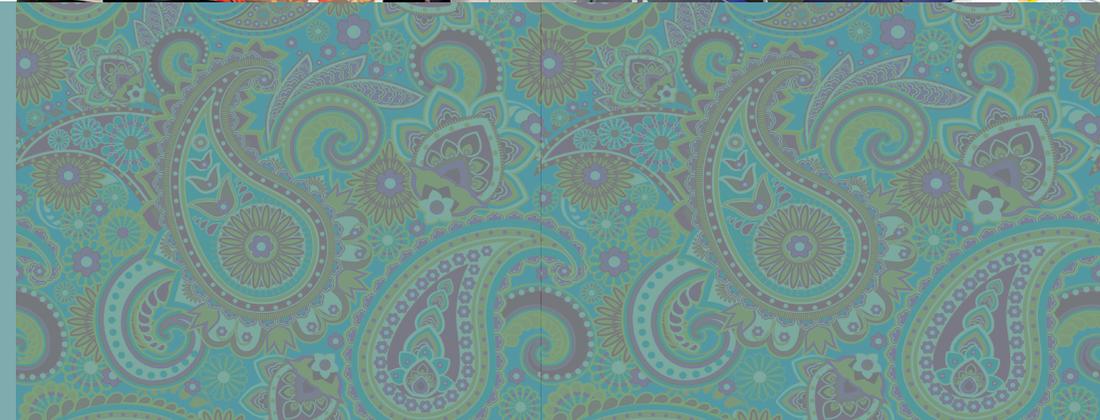

MACHINES AVAILABLE FOR THIS COURSE: JP4'16 - JP4evo - JP5 - JP6 JP7 - JPKevo - MiniLario

PRE-REQUISITES:

No requirements

CERTIFICATION:

At the end of the training course you will receive an MS Academy proficiency certificate

ADVANCED TRAINING

MS ACADEMY

LARIO SINGLE PASS

This advanced training is designed for MS customers who would like to deepen their knowledge on the maintenance and technical menus of the single-pass machine LaRio MS. The course will consist of theoretical sessions in the multimedia classroom and practical work sessions on machines.

The topics covered will range from an interface review, advanced menus, scheduled maintenance up to the alignment of the print heads, with in-depth analysis of the general architectures of the various machine areas.

GOALS:

- Understanding advanced machine menus and parameters
- Creating parameter backups
- Managing firmware updates
- Understanding and managing the importance of scheduled maintenance
- Managing the replacement and alignment of print heads
- Managing the RMA test guarantee procedure
- Understanding the general architectures of the various machine areas
- Knowing the techniques of resin and eco-sustainable resins (only for scanning with carpet)

TRAINING DURATION: 2 DAYS

PRE-REQUISITES:

To know the basics of printing or MS digital printers - advised for: maintainers, printer managers

CERTIFICATION:

At the end of the training course, you will receive an MS Academy proficiency certificate

SCANNING MACHINES

This advanced training is designed for MS customers who would like to deepen their knowledge on the maintenance and technical menus of large format scanning MS machines. The course will consist of theoretical sessions in the multimedia classroom and practical work sessions on machines.

The topics covered will range from an interface review, advanced menus, scheduled maintenance up to the alignment of the print heads, with in-depth analysis of the general architectures of the various machine areas.

GOALS:

- Understanding advanced machine menus and parameters
- Creating parameter backups
- Managing firmware updates
- Understanding and managing the importance of scheduled maintenance
- Managing the replacement and alignment of print heads
- Managing the RMA test guarantee procedure
- Understanding the general architectures of the various machine areas
- Know the techniques of resin and eco-sustainable resins (only for scanning with carpet)

TRAINING DURATION: 2 DAYS

MACHINES AVAILABLE FOR THIS COURSE: JP4*16 - JP4evo - JP5 - JP6 - JP7- JPKevo - MiniLario

PRE-REQUISITES:

To know the basics of printing or MS printers - recommended for: maintainers, printer managers

CERTIFICATION:

At the end of the training course you will receive an MS Academy proficiency certificate

PRINTING PROCESS

This advanced training is designed for MS customers who want to learn about digital printing, processes and color management in an environment dedicated to large format printers. The course requires a basic understanding of digital printing, so we recommend that you take a training on digital inkjet machines first (or have at least previous experience as printer).

GOALS:

- Understanding the standards of digital printing and its eco-sustainability
- Understanding the standards of print processes
- Understanding the chemistry of dyes and their formulation
- Understanding the standards of color management
- Creating an ICC profile and mastering each step of the calibration and characterization process

TRAINING DURATION: 1 DAY

PRE-REQUISITES:

Know the standards of printing or MS printers

CERTIFICATION:

At the end of the training course you will receive an MS Academy proficiency certificate

SOFTWARE MS ACADEMY

RAMSETE III

This training is designed for customers who want to learn the functions of Ramsete III dedicated to the preparation of designs for digital and traditional printing. The course consists of theoretical and practical sessions.

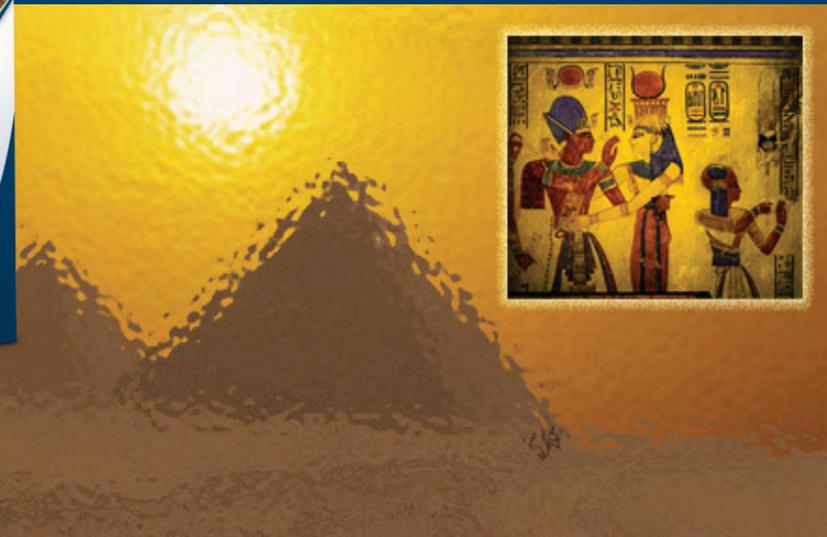

THE TOPICS TREATED ARE:

- SW interface
- Image acquisition
- Step and repeat
- Drawing and retouching
- Multichannel separation
- Colour chart management
- Colorways

**TRAINING DURATION: FULL 5 DAYS
COLORWAYS 3 DAYS**

PRE-REQUISITES:
For designers and color masters

CERTIFICATION:
At the end of the training course, you will receive an MS Academy proficiency certificate

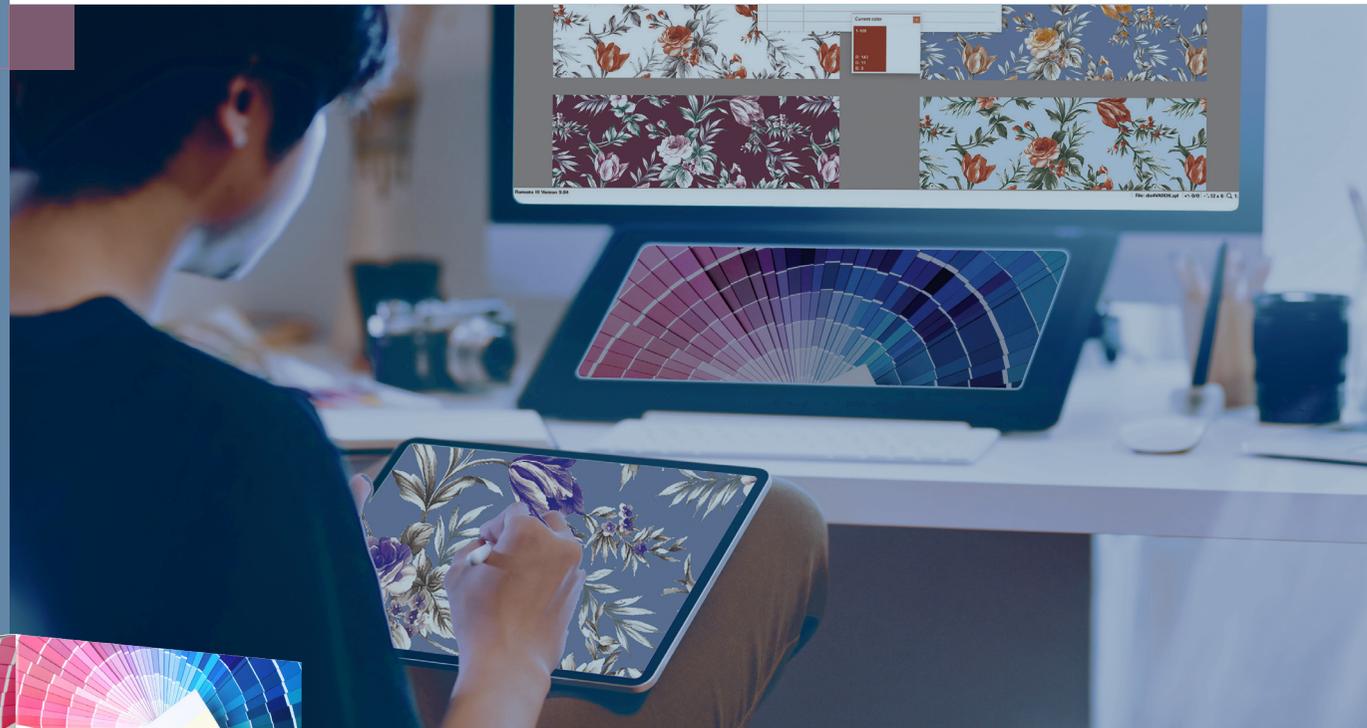

MATCHPRINT II

This training is designed for customers who want to learn the functions of MatchPrint II rip software dedicated to MS PRINTING SOLUTIONS digital printers. The course consists of theoretical and practical sessions.

THE TOPICS TREATED ARE:

- SW interface
- Calibration procedure
- Calibration management
- Layout management
- Functionality/Main menu
- Colour chart management
- Web job list
- Ink consumption

THIS TRAINING IS ONLY HELD AT THE CLIENT'S FACILITY

**TRAINING DURATION: TRANSFER PRINTING 3 DAYS
DIRECT PRINTING 5 DAYS**

PRE-REQUISITES:

For designers and machine operators

CERTIFICATION:

At the end of the training course, you will receive an MS Academy proficiency certificate
