

MS PRINTING SETS A NEW MILESTONE IN DIGITAL PRINTING WITH THE MINILARIO PRINTER

The now fastest digital textile scanning printer in the world

Caronno Pertusella, June 2019

Mini Lario – the new innovative digital scanning machine by MS Printing Solutions – is debuting at ITMA later this month (Barcelona, 20-26 June 2019 – Hall 3 ♦ A216). Mini Lario is expected to strongly influence the future market for digital textile printing, thanks to its strengths – compact design, speed and high-quality output – which make it the ideal printer for the segment.

Mini Lario has been developed to fill an existing gap in the market between the LaRio and the JPK-EVO in terms of speed and ROI. The 64 printheads allow Mini Lario to reach the incredible maximum printing speed of 1094 m/h (setting: 2xCMYK -1500/3000). Mini Lario features a host of technical innovations, including bold solutions such as positioning the printing carriage hang on the printing bridge. This solution allows for high-speed, accuracy and total system stability. “Mini Lario is now the fastest scanning machine in the world,” says Luigi Milini, MS Printing Solutions’ Honorary President. “We believe that only by staying one step ahead, can we drive technical change. We have done this with LaRio single pass, and we’re doing it again today with Mini Lario.”

The new LaRio’ s in-line fabric pretreatment will be also showcased at MS’s booth at ITMA. “We are proud to be among the leaders of industrial digital textile printing, succeeding in always finding new solutions for improving our customers’ work,” explains Paolo Milini, MS Printing Solutions’ President. The in-line pretreatment allows LaRio to take a new leap forward on the path of innovation. Pre-treatment is crucial in digital printing and the in-line solution brings great benefits, drastically reducing the set-up process, water, chemicals and energy consumption. “Developing sustainable technologies is our responsibility towards future generations and is the milestone of our green strategy,” concludes Paolo Milini.

Barcelona event will give to MS Printing' guests the opportunity to attend live-printing sessions, having a look at the other printers on display: JPK Evo (in new livery), JP4 EVO (equipped by mini-Jumbo feeding system) and JP7 (compact configuration by Curve-D Dryer).

Come visit our booth at ITMA Hall 3 ♦ A216

This is the place where to see our innovative products, speaking with our experts and much more.

MS Printing Solution

MS Printing Solution is a Dover Digital Printing company (www.doverdigitalprinting.com)

A long family history now reaching its 4th generation, full of experience and passion.

Tradition is very important for MS and with this deep knowledge of our industry, we strongly believe in the success of innovation. The MS knowledge and experience allows us to develop innovative products for the demanding and ever-changing market of digital textile printing. Our modern technologies allow us to improve any aspect of textile printing, starting from performance and up to including the important environmental issues. The versatility of these digital technologies also opens the way to different printed applications such as paper and plastic substrates.
